SMART MOBILITY, SUSTAINABLE TOMORROW

CORPORATE EMPLOYEE TRANSPORTATION

Corporate commutes, reimagined.

Electric-first fleet · Data-driven operations · Bengaluru

Shree Maruthi Travels - SMART MOBILITY TRANSPORT

— SMART MOBILITY —
— SUSTAINABLE TOMORROW —
— DRIVEN BY DATA · POWERED BY ELECTRIC —

Driven by Data · Powered by Electric

WHO WE ARE

Your **reliable** transportation partner

Established in 2017, Shree Maruthi Travels is a Bengaluru-based specialist in corporate employee transportation. We design and run secure, on-time, end-to-end staff mobility for multinationals, IT & ITES firms and manufacturing units — every pick-up and drop managed with discipline, accountability and a modern, electric-first fleet.

2017

Operating since

Nearing a decade running corporate ETS in Bengaluru.

4-in-1

Service lines

ETS · Rent-A-Cab · Ad-hoc · Package mobility.

EV

First fleet

Electric vehicles deployed as our default.

24×7

Control room

Round-the-clock support and live tracking.

Everyone promises technology. Few deliver its **purpose**.

Most ETS providers commit to apps, GPS and dashboards — then under-use them. The data fed in is incomplete and the outcomes that come out are never acted on. The technology exists; the purpose is lost.

The industry norm

- Vehicles tracked, but routes never optimised
- Occupancy mis-stated — empty seats billed
- Reports that no one reads or reconciles
- “Tech-enabled” on paper, manual in practice

The SMT way

- ✓ Clean, complete inputs — disciplined data entry
- ✓ Routes optimised for time, cost and safety
- ✓ True occupancy: you pay for seats used
- ✓ Billing-grade analytics you can act on

Mission & vision

MISSION

To be Bengaluru's most dependable corporate mobility partner

We exist to move people safely, punctually and sustainably — turning everyday commutes into a reliable, measurable service that corporates can build their operations around.

VISION

An electric-first, data-driven standard for employee transport

We see a future where every corporate fleet is clean, every route is intelligent, and every rupee billed reflects a seat genuinely used — and we intend to set that standard.

THE ELECTRIC ADVANTAGE

Going **electric**, by design

Electric vehicles are at the core of our fleet strategy — not a token add-on. The result is a cleaner, quieter, more cost-stable commute that strengthens your brand and your ESG story.

Lower emissions, stronger ESG

Cut commute carbon and feed real numbers into CSR & sustainability reporting.

A premium, quieter ride

Smooth, near-silent EVs elevate the daily employee experience and your brand.

Predictable running costs

Electric running costs insulate your transport budget from fuel-price swings.

Future-proof & compliant

Ahead of tightening emission norms and corporate green-mobility mandates.

Electric at the core

EV sedans & SUVs, deployed as standard

A **brand-new** fleet, built around you

We deploy the latest, brand-new vehicles — in the mix and capacity your operation actually needs. Scale up, scale down, or upgrade segments without changing partners.

Electric sedans & SUVs

Our default segment — clean, quiet and premium, for everyday shift movement.

Standard cabs & vans

Reliable hatchbacks, sedans and tempo-travellers for high-volume corridors.

Premium (Innova Crysta)

Executive-grade options for senior staff, guests and special movements.

Scalable on demand

Brand-new vehicles added as headcount grows — capacity matched to need.

Scope of services

Employee transport (ETS)

Managed home-to-office shift movement with rosters, escorts and on-time SLAs.

Rent-A-Cab (RAC)

Dedicated vehicles on flexible monthly terms for teams and individuals.

Ad-hoc / on-demand

Quick-turnaround bookings for one-off trips, events and last-minute needs.

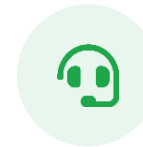

Package & dedicated

Fixed-route, fixed-vehicle contracts tailored to a campus or business unit.

EV Fleets of Choice

All-electric fleet you can choose by segment and capacity

24x7 help desk

Assigned account managers and round-the-clock control-room support.

Technology that **actually works**

We close the loop competitors leave open — disciplined inputs, optimised operations and reporting you can bill and act on.

Clean data discipline

Right inputs in: accurate addresses, rosters and trip logs that keep the system honest.

Route & occupancy optimisation

Smarter routing and real seat-occupancy — fewer empty miles, lower cost per head.

Billing-grade analytics

Week-on-week utilisation, shift-wise and cost reporting that reconciles to the rupee.

Live management dashboards

A single view of fleet, cost and performance — decisions backed by current data.

Why corporates **choose us**

One partner, end to end

ETS, RAC, ad-hoc, package and facility support — one accountable contact.

Electric-first fleet

A cleaner, quieter, brand-new fleet that strengthens your ESG position.

Data you can trust

True occupancy and billing-grade reporting — you pay only for what you use.

Built around your campus

Routes, rosters and vehicle mix tailored to your sites and shift patterns.

Safety & compliance

Verified drivers, maintained vehicles and escort-compliant night operations.

24×7 account support

Dedicated managers and a control room that answers when it matters.

"Our partnerships are built on trust, reliability, and a shared commitment to excellence."

OUR VALUED PARTNERS & CLIENTS

LET'S TALK

Let's move your people forward.

Tell us your sites, shifts and headcount — we'll design a brand-new, electric-first transport plan built around your operation.
